

TROPICAL CYCLONE BULLETIN NO. 2

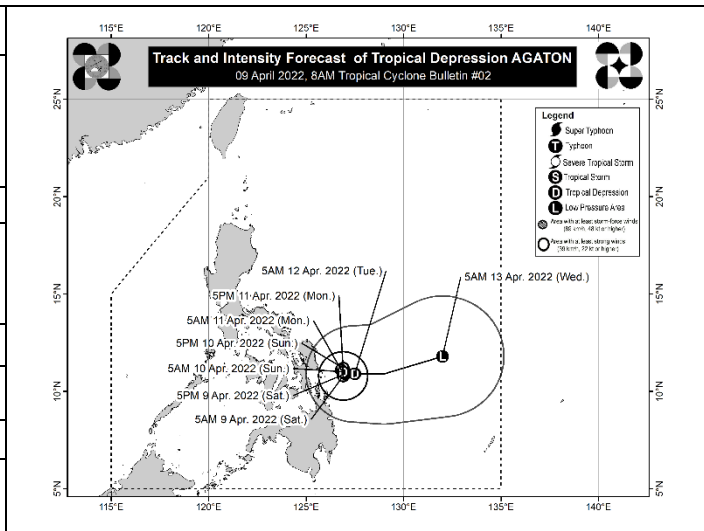

Tropical Depression “AGATON”

Issued at 8:00 AM, 09 April 2022

Valid for broadcast until the next bulletin at 11:00 AM today

TROPICAL DEPRESSION “AGATON” MEANDERS OVER THE EASTERN SEABOARD OF EASTERN VISAYAS.

Location of Center (7:00 AM)
The center of Tropical Depression “AGATON” was estimated based on all available data at 130 km East Southeast of Guiuan, Eastern Samar (10.8°N, 126.9°E)
Intensity
Maximum sustained winds of 45 km/h near the center, gustiness of up to 55 km/h , and central pressure of 1002 hPa
Present Movement
Almost stationary
Extent of Tropical Cyclone Winds
Strong winds or higher extend outwards up to 140 km from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 5:00 PM 09 April 2022	10.9	127.0	140 km E of Guiuan, Eastern Samar	45	TD	Almost stationary
24-Hour Forecast 5:00 AM 10 April 2022	11.0	127.0	140 km E of Guiuan, Eastern Samar	45	TD	Almost stationary
36-Hour Forecast 5:00 PM 10 April 2022	11.2	126.9	130 km E of Guiuan, Eastern Samar	45	TD	Almost stationary
48-Hour Forecast 5:00 AM 11 April 2022	11.1	126.8	120 km E of Guiuan, Eastern Samar	55	TD	Almost stationary
60-Hour Forecast 5:00 PM 11 April 2022	11.0	126.9	130 km E of Guiuan, Eastern Samar	55	TD	Almost stationary
72-Hour Forecast 5:00 AM 12 April 2022	10.9	127.5	195 km E of Guiuan, Eastern Samar	55	TD	E slowly
96-Hour Forecast 5:00 AM 13 April 2022	11.8	132.0	690 km E of Guiuan, Eastern Samar	-	LOW	ENE 20

TROPICAL CYCLONE BULLETIN NO. 2

Tropical Depression "AGATON"

Issued at 8:00 AM, 09 April 2022

Valid for broadcast until the next bulletin at 11:00 AM today

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
1 (Strong winds prevailing or expected within the next 36 hours)	-	Eastern Samar	Dinagat Islands and Siargao and Bucas Grande Islands
	Potential impacts of winds: Minimal to minor threat to life and property		

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

- **Today through tomorrow early morning:** Moderate to heavy with at times intense rains over Eastern Visayas, Dinagat Islands, and Surigao del Norte. Light to moderate with at times heavy rains over Masbate, Sorsogon, and the rest of Visayas and Mindanao.
- **Tomorrow early morning through Monday early morning:** Moderate to heavy with at times intense rains over Eastern Visayas, Dinagat Islands, Surigao del Norte, the northern and central portions of Cebu including Bantayan and Camotes Islands, and Bohol. Light to moderate with at times heavy rains over Masbate, Sorsogon, and the rest of Visayas and Mindanao.
- Under these conditions and considering significant antecedent rainfall, **scattered to widespread flooding (including flooding) and rain-induced landslides are expected** especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps.

Severe Winds

- Strong winds (strong breeze to near gale conditions) will be experienced within any of the areas where TCWS #1 is currently in effect during the passage of the tropical depression.

HAZARDS AFFECTING COASTAL WATERS

- In the next 24 hours, rough to very rough seas (2.8 to 4.5 m) will prevail over the seaboard of areas where TCWS #1 is hoisted and the northern and eastern coastal waters of Northern Samar. **These conditions may be risky for most seacrafts.** Mariners of small seacrafts are advised to remain in port or take shelter, while those operating larger vessels are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.
- Under the influence of the prevailing northeasterly wind flow, a **Gale Warning remains in effect** for several coastal waters not under any wind signal, specifically the northern and western seaboard of Northern Luzon. For more information, refer to Gale Warning #18 issued at 5:00 AM today.
- In the next 24 hours, moderate to rough seas (1.2 to 3.4 m) will also prevail over the remaining seaboard of the country that are not under any wind signal or gale warning. **These conditions may be risky for those using small seacrafts.** Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

TROPICAL CYCLONE BULLETIN NO. 2

Tropical Depression "AGATON"

Issued at 8:00 AM, 09 April 2022

Valid for broadcast until the next bulletin at 11:00 AM today

TRACK AND INTENSITY OUTLOOK

- Today through Monday, "AGATON" is forecast to remain almost stationary or move slowly as it meanders over the waters east of Eastern Visayas. Due to the expected erratic nature of its movement, a landfall over the coast of Eastern Samar is possible. However, the tropical depression may begin turning generally eastward on Monday or Tuesday as it interacts with the incoming tropical cyclone with international name "MALAKAS".
- "AGATON" is forecast to remain a tropical depression over the next three days, although there is marginal possibility of intensification into a tropical storm on late Sunday or on Monday. However, the disturbance may degenerate into a remnant low by late Tuesday or early Wednesday as "MALAKAS" begins to assimilate its circulation.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
